100 Victoria Embankment

Behind the classical façade, the internal space was extensively refurbished by KPF, leading it to win several architectural awards including the BCO award for best recycled building and further accolades from MIPIM, RIBA, IPA and ULI. The reconfiguration of the space provided contemporary workspace around a stunning and dramatic atrium, connected on the upper levels by a series of suspended bridges. 27,858 – 57,288 sq ft of office space is currently available over the third and fourth floors, with the floors offered as fitted-out or CAT A space depending on requirements. The building also offers best in class end-of-trip facilities including bike racks, showers and locker facilities.
